

Scores from the Colorado-provided April SAT® School Day administration will be available to students through their College Board account beginning **May 17, 2017**. Please share this date and the information below with students and families.

Student Access to Scores in the College Board Reporting Portal:

Students will have access to their scores through the College Board Reporting Portal. Most student scores, for students who tested on April 11, will be available beginning on May 17, 2017. However some scores will be released later for reasons that include participation in makeup testing, a late receipt of answer sheets, missing information on the answer sheet, or other exception conditions that require additional attention. Students who cancelled their scores will not receive a score in the Reporting Portal. If a score is not available, students should check the Portal on occasion for updates. The Portal will update daily as additional individual student scores are released. All individual student scores for the CO SAT will be released by June 30.

To access scores, students need a College Board Student Account. Steps for accessing scores are below:

1. Create a College Board Student Account

If students are creating their College Board account for the first time, they should go to studentscores.collegeboard.org and click **Sign Up** to create an account. Students must use their full legal name that matches what the school has on file. They should be prepared to provide basic information, including gender, date of birth, email address (a permanent email address that the student will still be able to access after graduation is recommended), high school name, expected high school graduation date, and zip code. Once the account is created, continue to step #2.

2. View Scores in the College Board Reporting Portal

To view scores, students will go to studentscores.collegeboard.org and sign in. If their scores are not shown, continue to step #3.

3. Match College Board Student Account and Registration

If a student is signed in but doesn't see their scores, it means we were not able to link their score report and account automatically. For security reasons, a student must verify additional information before we can display their scores. They will need either their SAT registration number or their State Student ID number. To match, they will:

a. Click **Add Score(s)**.

b. Review the personal information.

i. If any information is incorrect, click **Update** to revise. Students will be prompted to reenter their password.

ii. If the information is correct, click **Get My Scores**.

c. If a match is still not found, students will be prompted to provide either their test information, including their test date and registration number, or their State Student ID number.

i. To use test information to match, they will select SAT as their test. Enter "2017" as the test year. And, enter their SAT Registration Number. Click **Get My Scores**.

(Educators, this number can be found on the student admission tickets. Or, you may need to provide this number to your students. It can be found in the SAT Roster Detail report in the [Educator Reporting Portal](#).)

ii. To use their Student ID number to match, students will enter their State Student ID. Click **Get My Scores**.

There may still be cases in which a student is not able to view their scores using the steps above because the information is too different or the scores have not yet been finalized. If students cannot view their scores, they should call the College Board's Student SAT Help Line at 1-866-756-7346.
