## Advisement at Home

This week in advisement each grade level participated in a different activity.

### 9th Grade

Students in ninth grade participated in student council elections for their class.

## 10th Grade

Tenth graders learned about time management and how to implement a work life balance. Students learned how to set time management goals and were given resources to the career center. We believe this information is important so students are able to succeed in school while also taking care of their mental health.

## 11th Grade

Students in eleventh grade completed their student perception surveys from last week's advisement and finished their budgeting lesson. Students learned about credit scores, debt, and how to prioritize expenses. We believe this information is important to helping students succeed after graduation.

## 12th Grade

Seniors also finished their budgeting lesson from last week's advisement. Students also learned about credit scores, debt, and how to prioritize expenses. Seniors also learned how to access their ICAP to make sure they are ready for graduation. We believe this information is important to preparing students for graduation and life after graduation.

### **Continuing the Conversation at Home**

*Ask your 9th grader who was elected for student council.*

*Ask your 10th grader what skills they learned about time management. Can they explain what skill they would like to start implementing?*

*Ask your 11th or 12th grader to explain what a credit score is to you. Do they know what might affect their credit score?*

*Ask your 12th grader if they are ready for graduation. Can they log in and show you their ICAP?*

*Ask your student if they have any follow up questions about what they learned in advisement this week.*
